FEDERAL PUBLIC SERVICE COMMISSION

COMPETITIVE EXAMINATION FOR RECRUITMENT TO POSTS IN BS-17 UNDER THE FEDERAL GOVERNMENT, 2013

Roll Number

ZOOLOGY, PAPER-I

| TIME ALLOWED: | | (PART-I MCQs) | 30 MINUTES | MAXIMUM MARKS: 20 | | |
|--|-----|---------------|----------------------|--------------------------|--|--|
| THREE HO | URS | (PART-II) | 2 HOURS & 30 MINUTES | MAXIMUM MARKS: 80 | | |
| NOTE: (i) First attempt PART-I (MCQs) on separate OMR Answer Sheet which shall be taken back | | | | | | |
| after 30 minutes. | | | | | | |
| (ii) Overwriting/cutting of the options/answers will not be given credit. | | | | | | |

PART-I ((MCQs) (COMPULSORY)

Q.1. (i) Select the best option/answer and fill in the appropriate Circle on the OMR Answer Sheet. (20x1=20) (ii) Answers given anywhere, other than OMR Answer Sheet, shall not be considered.

| 1. | Metamerically segmented wo | | | | | | | |
|-----|---|------------|-------------------------|-------|------------------|--------------|-------------------|--|
| | (a) Nematoda | ` ´ | Platyhelminthes | (c) | Annelida | (d) | None of these | |
| 2. | Which of the following is a multiflagellate Protozoa? | | | | | | | |
| | (a) Ceratium | (b) | Noctiluca | (c) | Leishmania | (d) | None of these | |
| 3. | Spicules are secreted by: | | | | | | | |
| | | ` ' | Nematoblasts | ~ ~ | Endoblasts | · · · | None of these | |
| 4. | Which of the following is echinoderm? | aj | porous opening through | wh | ich water enters | the | hydrocoel of an | |
| | (a) Pedicellaria | (b) | Tube feet | (c) | Madreporite | (d) | None of these | |
| 5. | The body cavity of most trip | olobl | astic animals formed by | split | ting the mesoder | n int | o an outer and an | |
| | inner layer is called: | | | | | | | |
| | (a) Coelentron | (b) | Coelom | (c) | Colon | (d) | None of these | |
| 6. | Compound eyes are found in | | | | | | | |
| | (a) Platyhelminthes | | Ecinodermate | (c) | Mollusca | (d) | None of these | |
| 7. | Egg-laying mammals are play | ced i | n sub class: | | | | | |
| | (a) Meththeria | · · | Prototheria | (c) | Theria | (d) | None of these | |
| 8. | Open circulatory system is for | | | | | | | |
| | (a) Birds | (b) | Earthworms | (c) | Cockroaches | (d) | None of these | |
| 9. | Bivalve molluscs are usually | | | | | | | |
| | (a) Scavangers | | Deposit feeder | | Filter feeder | | None of these | |
| 10. | The pillar or central axis arou | | ÷ | - | | | | |
| | (a) Columella | · · | Collembola | (c) | Colloblasts | (d) | None of these | |
| 11. | The ninth vertebra of frog is | | | | | | | |
| | (a) Cervical | ` ' | Sacral | | Urostyle | | None of these | |
| 12. | The stage in an embryo in wh | | | | | | | |
| | (a) Gastrula | · · | Blastula | · · / | Morula | (d) | None of these | |
| 13. | A fish which migrates down | | _ | | | | | |
| | (a) Anadromous | ` ' | Catadromous | (c) | Dromiacea | (d) | None of these | |
| 14. | Which of the following has f | | | | | | | |
| | (a) Dog fish | | Frog | | Pigeon | (d) | All of these | |
| 15. | Facets by which vertebrae are | | | | | | | |
| | (a) Metapophyses | (b) | Parapophyses | (c) | Zygopophyses | (d) | None of these | |

ZOOLOGY, PAPER-I

16. The inner membrane of the two foetal membranes in reptiles, birds and mammals is called: (a) Amnion (b) Chorion (c) Peritoneum (d) None of these **17.** Amphioxus is an example of: (a) Urochordata (b) Cyclostomata (c) Hemichordata (d) None of these **18.** Filarial worm (genus Wuchereria) belong to phylum: (a) Nematoda (b) Platyhelminthes (d) None of these (c) Annelida **19.** Notochord is formed from primary: (a) Ectoderm (b) Mesoderm (c) Endoderm (d) All of these 20. Shell fish includes: (a) Shrimp, Crabs and eel fish (b) Dog fish, crabs and lobsters (d) All of these (c) Lobsters, crabs and shrimps

PART-II

| NOTE: (i) | Part-II is to be attempted on the separate Answer Book. |
|---------------|---|
| (ii) | Candidate must write Q. No. in the Answer Book in accordance with Q. No. in the Q. Paper. |
| (iii) | Attempt ONLY FOUR questions from PART-II, selecting TWO questions from EACH |
| | SECTION. ALL questions carry EQUAL marks. |
| (iv) | Extra attempt of any question or any part of the attempted question will not be considered. |
| | |

SECTION-A

| Q.2. | (a) (b) | Give an account of life cycle of Fasciola hepatica. Describe the various types of larval forms found in crustacea. | | | | (10) (10) | |
|------|---|---|-------------|-----------------|------------------------|--------------|------|
| Q.3. | (a) What is the difference between corallite and coral reef? Give a detailed account of the various forms of coral reefs. | | | | | (10) | |
| | (b) | Write an essay on parasitic adaptat | ion in p | latyhel | lminthes. | | (10) |
| Q.4. | (a) | Describe the morphology and mic mollusc such as Pila. | roscopi | c struc | ture of the shell of a | a gastropod | (10) |
| | (b) | Describe the water vascular system | n of star | fish. | | | (10) |
| Q.5. | Write | e short notes on the following:- | | | | (5 each) | (20) |
| | ` | a) Binary fission in Parameciumc) Leishmaniasis | (b) (d) | Flame Spicul | | | |
| | | <u>SECTI</u> | <u>ON-B</u> | | | | |
| Q.6. | (a) (b) | | | | | (10) (10) | |
| Q.7. | (a) Describe the pelvic girdle of frog with the help of labelled diagram.(b) Give a detailed structure of the eye of frog. | | | | (10) (10) | | |
| Q.8. | Write | e short notes on the following:- | | | | (5 each) | (20) |
| | | a) Biting mechanism of snakesc) Fish scales | | | Placenta Neuron | | |

FEDERAL PUBLIC SERVICE COMMISSION

COMPETITIVE EXAMINATION FOR RECRUITMENT TO POSTS IN BS-17 UNDER THE FEDERAL GOVERNMENT, 2013

ZOOLOGY, PAPER-II

| TIME ALLOWED: | | (PART-I MCQs) | 30 MINUTES | MAXIMUM MARKS: 20 | |
|--|-----|---------------|----------------------|--------------------------|--|
| THREE HO | URS | (PART-II) | 2 HOURS & 30 MINUTES | MAXIMUM MARKS: 80 | |
| NOTE: (i) First attempt PART-I (MCQs) on separate OMR Answer Sheet which shall be taken back | | | | | |
| after 30 minutes. | | | | | |
| (ii) Overwriting/cutting of the options/answers will not be given credit. | | | | | |

PART-I ((MCQs) (COMPULSORY)

| - | i) Select the best option/answer and fill in the appropriate Circle O on the OMR Answer Sheet. (20x1=20) |
|-----|--|
| (| ii) Answers given anywhere, other than OMR Answer Sheet, shall not be considered. |
| 1. | Which of these is a direct source of energy for muscle contraction? |
| | (a) ATP (b) Creatine phosphate (c) Lactic acid (d) Glucose (e) None of these |
| 2. | Muscle fatigue is caused by: |
| | (a) CO ₂ (b) Lactic acid (c) Fumaric acid (d) Ethyl alcohol (e) None of these |
| 3. | The functional unit in a skeletal muscle is called: |
| | (a) Actin filament (b) Sarcomere (c) Z line (d) Myosin filament (e) None of these |
| 4. | We would describe the layered, flat, scaly epithelium of human skin as: |
| | (a) Simple Squamous(b) Stratified Squamous(c) Stratified Columnar |
| _ | (d) Pseudo Stratified Cubiodal (e) None of these |
| 5. | Which of the following is not considered to be a tissue? |
| | (a) Cartilage (b) Mucous membrane lining the stomach (c) Blood (d) Brain (e) All of these |
| 6. | As a Zoologist you would look for looping movement in: |
| _ | (a) Earthworms (b) Poly chaetes (c) Echinoderms (d) Leeches (e) None of these |
| 7. | The elements of nervous system which help in co-ordination are: |
| ø | (a) Receptors (b) Neurons (c) Effectors (d) All of these (e) None of these The distal and of which of these neurons lie adjacent to blood stream. |
| 8. | The distal ends of which of these neurons lie adjacent to blood stream:(a) Afferent neurons(b) Efferent neurons(c) Inter neurons |
| | (d) Neuro secretory neuron (e) All of these |
| 9. | The electrical potential that exists across a cell membrane is: |
|). | (a) Resting membrane potential (b) Active membrane potential (c) Automatic potential |
| | (d) All of these (e) None of these |
| 10. | A nerve is a: |
| 100 | (a) Collection of neurons (b) Concentration of dendrites and exons |
| | (c) Bundles of exons or dendrites of neurons |
| | (d) Bundles of exons or dendrites bounded by connective tissues (e) None of these |
| 11. | Which of these is a correct statement? |
| | (a) All of the neurons are excitable (b) All of the neurons can transmit impulses across their membrane |
| | (c) Transmission of nurve impulses is always unidirectional (d) All of these statements |
| | (e) None of these |
| 12. | Sodium-Potassium pump operates with the help of which of these enzymes: |
| | (a) Na ⁺ -K ⁺ ATPase (b) Phosphatase (c) Isomerase (d) Hydrolase (e) None of these |
| 13. | Name of the chemical messengers released to the exterior of one animal that affect the behaviour of |
| | another individual of the same species: |

(a) Neuropeptides (b) Neurohormones (c) Pheromones (d) Neurotransmitters (e) None of these

ZOOLOGY, PAPER-II

| 14. | Hormones that the Thyroid gland secrets are: | | | | | | |
|-----|--|---|--|--|--|--|--|
| | a) Proteins (b) Amines (c) Steroids (d) Carbohydrates (e) All of these | | | | | | |
| 15. | Thyroxine is: | | | | | | |
| | a) An enzyme (b) A hormone (c) A vitamin (d) An excretory waste (e) None of these | ; | | | | | |
| 16. | Development of Secondary Sexual characters in a female is controlled by: | | | | | | |
| | a) STH (b) Androgens (c) TSH (d) Estrogens (e) None of these | | | | | | |
| 17. | nsulin is a hormone which is secreted by: | | | | | | |
| | (a) Islet of langerhans and regulates glucose level in blood (b) Thyroid and regulates growth | | | | | | |
| | (c) Adrenals and regulates heart beat (d) Pituitary and regulates reproduction (e) None of these | | | | | | |
| 18. | Hormone responsible for regulation of calcium and phosphorous is secreted by: | | | | | | |
| | a) Thyroid (b) Para-thyroid (c) Adrenals (d) Thymus (e) None of these | ; | | | | | |
| 19. | A hormone responsible for conversion of glucose into glycogen within the liver is called: | | | | | | |
| | a) Secretin (b) Gastrin (c) Pancreozymin (d) Insulin (e) None of these | ; | | | | | |
| 20. | Fibrinogen is found in the: | | | | | | |
| | a) Bile and produced in liver (b) Blood and produced by RBCS | | | | | | |
| | c) Blood and produced in liver (d) Bone and produced in bone marrow (e) None of these | ; | | | | | |

PART-II

NOTE: (i) Part-II is to be attempted on the separate Answer Book.

(ii) Candidate must write Q. No. in the Answer Book in accordance with Q. No. in the Q. Paper.
(iii) Attempt ONLY FOUR questions from PART-II, selecting TWO questions from EACH

(iii) Attempt ONLY FOUR questions from PART-II, selecting TWO questions from EACH SECTION. ALL questions carry EQUAL marks.

(iv) Extra attempt of any question or any part of the attempted question will not be considered.

SECTION-A

| Q.2. | Describe the phenomenon of Mitotic Cell division in animals. | (20) | | | |
|------|--|------|--|--|--|
| Q.3. | Define an allele. Explain Mendel's principle of Independent assortment with examples. | (20) | | | |
| Q.4. | Q.4. What do you know about sex-linked inheritance? Explain with examples. | | | | |
| | SECTION-B | | | | |
| Q.5. | Do you believe in "Evolution". Give evidences in favour of the theory. | (20) | | | |
| Q.6. | Define bio-geochemical cycles. Explain 'Nitrogen' cycle diagrammatically. | (20) | | | |
| Q.7. | What is Darwinism? Differentiate it from Lamarkism. What do you know about the synthesis of Darwinian theory with population genetics? | (20) | | | |
| Q.8. | Describe various interactions among animal populations | (20) | | | |
